

# Clean, Fresh And Germ Free? Take A Look Through Your Guest's Eyes.

Whether it's your airline seat, rental car, or hotel room, hygiene standards are always concerns for travelers. From outbreaks of Norwalk virus on cruise ships to fears over SARS it seems there is a new health scare every week in the travel and hospitality industry. Cleanliness may be considered next to godliness but it might be next to profitability. Consumers rank the cleanliness and safety of a facility as the two top items when choosing where to spend their time and money.

## Because We Care, We Kill.... Germs.

SaniGuard® Sprays and Foggers give you and your guest the comfort of knowing not only are their rooms clean, but virtually germ free. Bathroom sinks, tubs, showers and toilets are known harbingers of infectious germs, but regardless of the number of chairs a guest will almost always sit on the edge of the bed and reach for the TV remote. Microbiology studies indicate the remote is almost always the most germ laden surface in the entire room. Only proper sanitation of all surfaces can stop illness causing germs in their tracks.

## Time Is Money.

SaniGuard® Total Release Foggers allow you to sanitize an entire guest room in just minutes and is just as effective as the sanitizing spray. It's perfect for large hot spot areas such as lobbies, rest rooms, spa and workout areas and administrative offices.

By simply releasing a SaniGuard® fogger in a guest room you sanitize items that can normally take valuable time from your housekeeping staff. Bedspreads, phones, TV remotes, furniture, even the carpet are quickly and completely rid of illness causing germs like Staph, Strep, Herpes, HIV, Hepatitis and many more.

## We Go Where The Germs Go.

- Airplane Cabins
- Cruise Ships
- Public Transportation
- Tour Buses
- Casinos
- Rental Cars
- Spas
- Banquet Rooms
- Trains
- Amusement Parks
- Theaters
- Tanning Beds

### Stop The Spread Of:

- Flu and Colds
- Measles
- Chicken Pox
- Mumps
- Sore Throats
- Diarrhea Causing Bacteria
- Hepatitis B
- Herpes
- HIV

## Your Reputation – People's Choice.

Your customer's word of mouth is the most valuable form of advertising you have. By protecting them from the germs, bacteria and viruses that affect their health you show them you care and they will reward you with their loyalty. SaniGuard® gives you the tools to protect their environment and the confidence to assure your guest's well being.

Saniguard® spray is available in two convenient sizes, 10 oz. aerosol and .75 oz. size perfect for personal use. Foggers also come in two sizes, the 8 oz. fogger treats up to 625 square feet in one application or the 2.5 oz. size to treat smaller rooms up to 155 square. feet.

## Safe For Your Staff.

Unlike many other sanitizing products on the market SaniGuard® Spray and Foggers are safe to use in almost any situation with no dermal, oral or inhalation toxicity. Your staff can be confident they are providing themselves and your guests with a safe and healthy environment.
